SUMMARY

Computer Science student and Frontend Developer specializing in Frontend development as **React.js**. Skilled in **HTML, CSS, JavaScript, Bootstrap, TypeScript, Data Structures, Algorithms, object-oriented programming, C, Java**. Passionate about Software Design Specification (SDS), software development life cycle (SDLC) and Responsive design. Skilled in using tools Like **Git, GitHub**.

I enjoy solving programming challenges and creating responsive high-quality websites, by agile, lean workflow and passionate about ideation session. Looking to work with companies that value dedicated developers who bring creativity, leadership potential, and a collaborative approach to their teams.

EXPERIENCE & PROFESSIONAL TRAINING

Digital Egypt Pioneers Initiative (DEPI) – Frontend Developer Trainee (React.js) *(July 2025- Dec 2025)*

- Selected for the national Digital Egypt Pioneers Initiative by MCIT, focused on frontend web development.
- Receiving hands-on training in **React.js, HTML, CSS, and JavaScript** to build responsive and scalable web application.
- Strengthened soft skills including **teamwork**, time management, and problem solving, while improving **English communication** through presentations and collaboration; also provided coaching to peers and started exploring freelancing opportunities in front-end development

Route Front End Web Development Diploma *(April 2026 - Present)*

- Learning Front-End Development Diploma with focus on **HTML5, CSS3, JavaScript (ES6+)**, and modern frameworks.
- Developing scalable, responsive web applications using **React.js and Next.js**, applying component-based architecture.
- Implementing modern UI/UX using **Bootstrap, Tailwind CSS, and Sass**, ensuring cross-browser compatibility and mobile responsiveness.
- Utilizing **TypeScript** for type-safe development and improved code maintainability in large-scale applications.

EDUCATION

Bachelor's degree at faculty of computer science and Artificial intelligence.

Helwan University (2023 - 2027)

- Major: Information System.
- Cumulative GPA: 3.47

PROJECTS

iClinic Website

[GitHub Repo](#) | [Live Demo](#)

A healthcare web application that enables patients to book appointments, communicate with doctors via chat or video calls, and allows doctors to manage patient records and clinic schedules efficiently. My role in the website:

- Designed and developed responsive Pages by **React.js, CSS and Bootstrap** .
- Build the **UI design** for Authentication Pages (Login, Sign Up, Verification) on **Figma**
- Developed responsive for **Patient and Doctor pages**, including **profiles and basic dashboard** features.
- Ensured **mobile responsiveness** and improved user experience using modern CSS frameworks as **Bootstrap**.

NutriPlan Website

[GitHub Repo](#) | [Live Demo](#)

A JavaScript web app for meal discovery, packaged-food lookup, and daily nutrition tracking, built on a custom REST API.

- Developed a complete restaurant website using **HTML, Tailwind and JavaScript**.
- Built a Recipes module with **live search, category/area filtering, and detailed meal views**, consuming a custom **REST API**.
- Implemented a **Product Search & Barcode Scanner** with Nutri-Score (A–E) filtering and category browsing and **Deleting** the meal if you choose then did not eat preventing count its calories for th day.
- Built a Daily Food Log that tracks calories, protein, carbs, and fat per day, with weekly overviews and automatic day/week resets, **persisted via localStorage**.
- Structured the app into **modular ES6 files** (meals, product scanner, food log) with clean data flow between **modules**

Kanban Task Website

[GitHub Repo](#) | [Live Demo](#)

A TypeScript-based Kanban board for creating, tracking, and moving tasks across To Do, In Progress, and Complete columns.

- Developed a **Page and pop up** using **HTML, Tailwind CSS, and TypeScript**.
- Built full task **CRUD functionality (create, edit, delete)** via a dynamic modal with title, priority, due date, and description fields.
- Implemented **task movement** between To Do / In Progress / Complete columns with priority-based styling and **relative "time ago" timestamps**.
- Used **TypeScript interfaces and typed DOM handling** for safer **state management** across task arrays.
- Persisted all task data with **localStorage**, so state survives page reloads

SKILLS

Technical skills: React.js | HTML5 | CSS3 | JavaScript | TypeScript | Algorithm | Data structures | Object-oriented programming | C | Java | SQL | GitHub | Bootstrap | Tailwind | jQuery | Sass.

Soft Skills: Communication Skills | Public Speaking | Collaboration and Teamwork | Problem-Solving | Time Management | Providing Feedback on user flows | Mentoring.

LANGUAGES

- Arabic (Native)
- English (Fluent in speaking and understanding)
